Neurodiversity Brownbag Workshop

Reviewing Accessibility Issues
on the College of Charleston Campus
James Ward, Landscape Architect
General Issues

• Inside Buildings
  • Elevator placement and repair
  • Difficult doors
  • Threshold Issues
  • Older buildings – access in general
  • Difficult to find one’s way around
  • No ongoing monitoring and communication of maintenance issues
St. Philip Street

• Sidewalks are too narrow
• Road crossings are inadequate
• Crosswalks are underwater
• Needs to accommodate drop off better
• Better signage
Example of a crowd-sourced survey for flooding that I will adjust to have it work for accessibility issues.
